## CALIFORNIA TRANSPORTATION COMMISSION SEPTEMBER 2023 BASELINE AGREEMENT ADDENDUM

On September 6, 2023, California Transportation Commission staff approved an addendum to the 2018 Solutions for Congested Corridors Program Baseline Agreement for the **US 50 Multimodal Corridor Enhancement Project**.

This addendum included the following documents:

- 1. Road Repair and Accountability Act of 2017 Project Baseline Agreement Addendum Request (pages 2-4)
- 2. Letter from the implementing agency to request this amendment (pages 5-6)
- 3. Revised electronic Project Programming Requests for the impacted components (pages 7-34)
- 4. Original Baseline Agreement received by the Commission in October 2018 (pages 35-60)

#### **California Transportation Commission**

## ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017 PROJECT BASELINE AGREEMENT ADDENDUM

l.	FUNDING PROGRAM
	☐ Active Transportation Program
	☐ Local Partnership Program (Competitive)
	<ul> <li>Solutions for Congested Corridors Program</li> </ul>
	☐ State Highway Operation and Protection Program
	☐ Trade Corridor Enhancement Program

#### 2. PARTIES AND DATE

2.1 This Project Baseline Agreement Addendum (Addendum) for the US 50 Multimodal Corridor Enhancement Project effective on October 17, 2018 is made by and between the California Transportation Commission (Commission), the California Department of Transportation (Caltrans), the Project Applicant, the Sacramento Area Council of Governments (SACOG), Sacramento Transportation Authority (STA), and Sacramento Regional Transit District (SacRT) and Caltrans, and the Implementing Agency, Caltrans and SacRT, sometimes collectively referred to as the "Parties".

#### 3. GENERAL PROVISIONS

- 3.1 The Parties are entering into this Project Baseline Agreement Addendum to document minor adjustments as approved by the Commission. This Form and attached documents hereto will formally document any authorized modifications. This may include a revised Project Report, revised Project Funding Plan, minor change of Project Scope, and/or Project Programming Requests. Adjustments reserved for the Addendum are not considered significant enough to initiate a Baseline Agreement Amendment.
- 3.2 The undersigned Project Applicant certifies that the funding sources cited are committed and expected to be available; the estimated costs represent full project funding; and the scope and description of benefits is the best estimate possible, and no further adjustments are known or foreseen.
- 3.3 The undersigned Project Applicant acknowledges the Baseline Agreement is still in full effect and this Addendum does not replace the original approved Baseline Agreement.

#### Modification:

SacRT respectfully requests an addendum to the existing Project Baseline Agreement to update the following items:

- Update the Project Schedule/Milestones
- Update the Project Scope to include PPNOs 1787A, 1787B, 1787C as approved at the May 14, 2020, CTC meeting.
  - Construct only one passing track (0.53 miles) near the Glenn Light Rail Station (PPNO 1787A).

#### **California Transportation Commission**

## ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017 PROJECT BASELINE AGREEMENT ADDENDUM

- Procurement of twenty (20) low floor light rail vehicles (seven (7) for expansion service and thirteen (13) for replacement of high-floor vehicles) to deliver 15-minute service along the Gold Line between Sunrise and Historic Folsom stations, which currently operates at 30-minute frequencies (PPNO 1787B).
- o Conversion of all 29 light rail stations along the Gold Line to allow new low floor LRVs to operate on that line (PPNO 1787C).

#### Justification for Modification:

The baseline agreement addendum is justified for the following reasons:

- Update Project Schedule/Milestones: The existing baseline agreement includes language that "This baseline agreement will be amended when the Project Approval and Environmental (PA&ED) milestone is reached for Gold Line Light Rail Improvements between Sunrise Blvd and Downtown Folsom." This milestone has been completed and updating the included milestones through this addendum will satisfy this requirement.
- Update Project Scope: The existing baseline agreement only lists the original scope of 8,963 feet of new side tracking. This update will align the baseline agreement with the scope amendment approved by the CTC in May 2020. The resolution indicated that the baseline agreement would be amended, but that did not occur. This addendum will satisfy this requirement.

Tanisha Taylor
Interim Executive Director
California Transportation Commission
1120 N Street MS 52
Sacramento, CA 95814

Dear Tanisha,

Sacramento Regional Transit (SacRT) respectfully requests an addendum to the original 2018 Baseline Agreement for the Cycle 1 Solutions for Congested Corridors (SCCP) funded US 50 Multimodal Corridor Enhancement Project at the August 16-17, 2023 California Transportation Commission meeting. SacRT is a co-applicant with Caltrans District 3 on this project which includes the US 50 HOV Project- I-5 to Watt Avenue (Caltrans), and the Gold Line Light Rail Improvements Between Sunrise Blvd to Downtown Folsom (SacRT).

#### **Background**

SacRT and Caltrans District 3 were awarded Cycle 1 SCCP funds for the US 50 Multimodal Corridor Enhancement Project at the May 16, 2018 CTC meeting. This project includes the US 50 HOV Project- I-5 to Watt Avenue (Caltrans), and the Double Tracking of Portions of the Gold Light Rail Line (SacRT). SacRT's double tracking project scope included 1.7 miles of side tracking. The baseline agreement for the project was approved on October 17, 2018.

At the May 14, 2020 CTC meeting, the Commission approved a scope modification for SacRT's project. This changed the original scope 8,963 feet (1.7 miles) of side tracking to the scope below:

- Construct only one passing track (0.53 miles) near the Glenn Light Rail Station (PPNO 1787A).
- Add 2 subcomponents not originally in the scope of the SSCP project:
  - Procurement of twenty (20) low floor light rail vehicles (seven (7) for expansion service and thirteen (13) for replacement of high-floor vehicles) to deliver 15-minute service along the Gold Line between Sunrise and Historic Folsom stations, which currently operates at 30-minute frequencies (PPNO 1787B).
  - Conversion of all 29 light rail stations along the Gold Line to allow new low floor LRVs to operate on that line (PPNO 1787C).

The revised scope preserves the benefits of the original project scope, including reduced greenhouse gas emissions, increased train frequency along with increased transit ridership, improved mobility for all travel modes, improved bike and pedestrian access, and connectivity and consistency with the companion Caltrans US 50 HOV project.

#### **Baseline Agreement Modification Request**

SacRT requests approval of a baseline agreement addendum to update the baseline agreement with the following changes:

- Updated Project Schedule/Milestones
- Updated Project Scope to include PPNOs 1787A, 1787B, 1787C as approved at the May 14, 2020 CTC meeting.
  - Construction of only one passing track (0.53 miles) near the Glenn Light Rail Station (PPNO 1787A).
  - Procurement of twenty (20) low floor light rail vehicles (seven (7) for expansion service and thirteen (13) for replacement of high-floor vehicles) to deliver 15-minute service along the Gold Line between Sunrise and Historic Folsom stations, which currently operates at 30-minute frequencies (PPNO 1787B).
  - Conversion of all 29 light rail stations along the Gold Line to allow new low floor LRVs to operate on that line (PPNO 1787C).

#### **Baseline Agreement Modification Justification**

The baseline agreement addendum is justified for the following reasons:

- Updates Project Schedule/Milestones: The existing baseline agreement includes language that "This baseline
  agreement will be amended when the Project Approval and Environmental (PA&ED) milestone is reached for
  Gold Line Light Rail Improvements between Sunrise Blvd and Downtown Folsom." This milestone has been
  completed and updating the existing milestones in this addendum will satisfy this requirement.
- Updates Project Scope: The existing baseline agreement only lists the original scope of 8,963 feet of new side tracking. This update will align the baseline agreement with the scope amendment approved by the CTC in May 2020. The resolution indicated that the baseline agreement would be amended, but that did not occur. This addendum will satisfy this requirement.

Please consider this request to update the baseline agreement to reflect the above project changes previously approved by CTC.

Sincerely,

Henry Li,

General Manager/CEO

Project Title					

US 50 Multimodal Corridor Enhancement Project/Gold Line Light Rail Improvements Between Sunrise Blvd to Downtown Folsom

#### Location (Project Limits), Description (Scope of Work)

In Sacramento County, from Sacramento Valley Station to the Downtown Folsom Station. This project will enhance the light rail capacity on the Gold Line. The project consists of the construction of track sidings to allow trains to pass in the section of single tracks on the Gold Line between the Sunrise Station and Historic Folsom Station. This will permit trains to operate with 15-minute frequencies between those stations, where they currently operate with 30-minute frequencies. The additional frequencies will increase ridership and reduce vehicle miles traveled on US-50. This will also help improve traffic signal phasing for all roadway intersection along Folsom Blvd in Folsom, thus improving roadway traffic flow. This project is a co-applicant with the Caltrans Sacramento US 50 HOV Project from I-5 to Watt Ave for the SB1 Solutions for Congested Corridor Program funds.

Date 08/16/2023 11:05:53

Support congestion reduction on US 50 by enhancing the light rail system. This will accomplished with double tracking portions of the Gold Line to increase the frequency of service from every 30 minutes to every 15 minutes from Sunrise Blvd to Downtown Folsom. The additional Light Rail frequency is expected to increase the ridership and reduce vehicle miles travelled along this corridor. The combination of new HOV lanes and additional Light Rail service is expected to improve the mobility along this corridor with a multimodal approach.

# ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017 PROJECT BASELINE AGREEMENT

US 50 Multimodal Corridor Enhancement Project

	Resolution
	(will be completed by CTC)
1.	FUNDING PROGRAM
	Active Transportation Program
	Local Partnership Program (Competitive)
	Solutions for Congested Corridors Program
	State Highway Operation and Protection Program
	Trade Corridor Enhancement Program
2.	PARTIES AND DATE
2.1	This Project Baseline Agreement (Agreement) for the <i>US 50 Multimodal Corridor Enhancement Project</i> , effective on,
3.	RECITAL
3.2	Whereas at its May 16, 2018 meeting the Commission approved the Solutions for Congested Corridors Program, and on March 22, 2018 the State Highway Operation and Protection Program, and included in this program of projects the <i>US 50 Multimodal Corridor Enhancement Project</i> , the parties are entering into this Project Baseline Agreement to document the project cost, schedule, scope and benefits, as detailed on the Project Programming Request Form attached hereto as Exhibit A and the Project Report attached hereto as Exhibit B, as the baseline for project monitoring by the Commission.
3.3	The undersigned Project Applicant certifies that the funding sources cited are committed and expected to be available; the estimated costs represent full project funding; and the scope and description of benefits is the best estimate possible.
١.	GENERAL PROVISIONS
	The Project Applicant, Implementing Agency, and Caltrans agree to abide by the following provisions:
.1	To meet the requirements of the Road Repair and Accountability Act of 2017 (Senate Bill [SB] 1, Chapter 5, Statutes of 2017) which provides the first significant, stable, and on-going increase in state transportation funding in more than two decades.
.2	To adhere, as applicable, to the provisions of the Commission:  Resolution Insert Number, "Adoption of Program of Projects for the Active Transportation Program", dated
	Resolution Insert Number, "Adoption of Program of Projects for the Local Partnership Program", dated
	Resolution SCCP-P-1718-01, "Adoption of Program of Projects for the Solutions for Congested Corridors Program", dated May 16, 2018
	Resolution G-018-13, "Adoption of Program of Projects for the State Highway Operation and Protection Program", dated March 22, 2018
	Resolution Insert Number, "Adoption of Program of Projects for the Trade Corridor Enhancement Program", dated

- 4.3 All signatories agree to adhere to the Commission's Solutions for Congested Corridors Program, State Highway Operation and Protection Program, Guidelines. Any conflict between the programs will be resolved at the discretion of the Commission.
- 4.4 All signatories agree to adhere to the Commission's SB 1 Accountability and Transparency Guidelines and policies, and program and project amendment processes.
- 4.5 Caltrans, SACOG, and STA for the HOV lane project, and SacRT for the light rail project agrees to secure funds for any additional costs of the project.
- 4.6 Caltrans and the regional agency agree to report on a quarterly basis; after July 2019, reports will be on a semi-annual basis on the progress made toward the implementation of the project, including scope, cost, schedule, outcomes, and anticipated benefits.
- 4.7 Caltrans agrees to prepare program progress reports on a quarterly basis; after July 2019, reports will be on a semi-annual basis and include information appropriate to assess the current state of the overall program and the current status of each project identified in the program report.
- 4.8 Caltrans agrees to submit a timely Completion Report and Final Delivery Report as specified in the Commission's SB 1 Accountability and Transparency Guidelines.
- 4.9 All signatories agree to maintain and make available to the Commission and/or its designated representative, all work related documents, including without limitation engineering, financial and other data, and methodologies and assumptions used in the determination of project benefits during the course of the project, and retain those records for four years from the date of the final closeout of the project. Financial records will be maintained in accordance with Generally Accepted Accounting Principles.
- 4.10 The Transportation Inspector General of the Independent Office of Audits and Investigations has the right to audit the project records, including technical and financial data, of the Department of Transportation, the Project Applicant, the Implementing Agency, and any consultant or sub-consultants at any time during the course of the project and for four years from the date of the final closeout of the project, therefore all project records shall be maintained and made available at the time of request. Audits will be conducted in accordance with Generally Accepted Government Auditing Standards.

### 5. SPECIFIC PROVISIONS AND CONDITIONS

5.1 Project Schedule and Cost

See Project Programming Request Form, attached as Exhibit A.

5.2 Project Scope

See Project Report or equivalent, attached as <u>Exhibit B</u>. At a minimum, the attachment shall include the cover page, evidence of approval, executive summary, and a link to or electronic copy of the full document.

5.3 Other Project Specific Provisions and Conditions

This baseline agreement is for the following projects:

03-3F360 Sac 50 HOV

03-0H080 Sac 50 Rehab

03-R389G/0318000337 SacRT Light Rail Improvements

This baseline agreement will be amended when the Project Approval and Environmental (PA&ED) milestone is reached for Gold Line Light Rail Improvements between Sunrise Blvd and Downtown Folsom.

Executive Summary

# State Copyral To Folsom To Placerville Gold Line Light Rail

The US 50 Multimodal Corridor Enhancement Project in Sacramento County consists of the US 50 HOV Lanes project (03-3F360) from I-5 to Watt Avenue, the SAC 50 Rehabilitation project (03-0H080) from I-5 to Watt Avenue, and the Sacramento Regional Transit District's (SacRT) light rail expansion project from Sunrise Boulevard to Downtown Folsom. The overall goal is to reduce congestion and improve mobility along this corridor with a multimodal approach.

US 50 HOV Lanes/Rehab

The purpose of the HOV Project is to reduce congestion on US 50 by extending the existing HOV lanes to help implement the Sacramento Region Bus/Carpool Lane Network Vision. The multimodal combination of new HOV Lanes, and additional light rail service is expected to improve the mobility for everyone along this corridor. The HOV project is needed because the US 50 corridor is experiencing substantial recurring congestion during peak commute periods. The amount and duration of congestion is expected to increase in the future as suburban development continues in the eastern portions of Sacramento County and El Dorado County. This Project will improve mobility, provide an option for reliable peak period travel time, and provide incentives for commuters to use buses, carpools, vanpools, or light rail for peak period travel to improve traffic operations by reducing congestion and travel time.

The purpose of the rehabilitation portion of the project is to replace the existing concrete pavement, reduce maintenance crew's exposure to live traffic, and reduce maintenance expenditure. The project scope also includes the restoration of other roadway elements such as drainage, lighting, and pedestrian facilities. The existing concrete pavement was built between 1967 and 1971 and has reached the end of its service life. It is deteriorated and has a poor ride quality that requires annual maintenance to repair and maintain. A recent pavement condition survey conveyed that there is severe slab cracking and faulting. The rehabilitation project also proposes to increase the deficient vertical clearance at seven Overcrossing structures in the project limits as identified in the District 3 Goods and Movement Study.

This increased vertical clearance will reduce the frequency of "high load" hits, reduce maintenance worker exposure to traffic, and improve freight mobility in this corridor.

Gold Line Light Rail Improvements Between Sunrise Blvd to Downtown Folsom project will enhance the light rail capacity by constructing track sidings to allow trains to pass in the section of single tracks on the Gold Line between the Sunrise Station and Historic Folsom Station. This will permit trains to operate with 15-minute frequencies between those stations, where they currently operate with 30-minute frequencies. The additional frequencies will likely increase ridership.

### Additional Information

DESCRIPTION (CONTINUED):

This project is a co-applicant with the Sacramento Regional Transit District's (SacRT) Light Rail expansion project from Sunrise Blvd to Downtown Folsom for the SB1 Solutions for Congested Corridor Program funds.

9/13/18

Date:

The US 50 Multimodal Corridor Enhancement Project in Sacramento County combines the US 50 HOV Lanes project (03-3F360) and the SAC 50 Rehabilitation project (03-0H080), and the Sacramento Regional Transit District's (SacRT) Light Rail expansion project from Sunrise Blvd to Downtown Folsom.

The actual work limits are longer than 14 HOV lane miles constructed.

The SAC 50 Rehabilitation project (03-0H080) is fully funded by State Highway Operation and Protection Program (SHOPP) for \$323.9 million and will rehabilitate 53 lane miles of mainline with a long life pavement (The programmed 56 lane miles included mainline and auxiliary lanes in it. However, the pavement condition survey computed 53 lane miles reflecting only mainline traveled way. This 53 lane miles is reported in District's asset management database.), increase the vertical clearance of seven structures to Federal Standards to improve Freight Mobility along the corridor, and upgrade pedestrian ramps and sidewalks throughout the corridor to current Americans with Disabilities Act (ADA) standards.

### PROJECT BENEFITS (CONTINUED):

- 3. Improving US 50 to meet the growing travel demand in the Sacramento region
- 4. Providing an option for reliable peak period travel time
- 5. Using the highway facilities as efficiently as possible
- 6. Improving general traffic operations by reducing congestion and travel time
- 7. Improving bicycle and pedestrian access on local roads in the vicinity of the project

### PURPOSE AND NEED (CONTINUED):

This Project is needed because the US 50 corridor is experiencing substantial recurring congestion during peak commute periods. The amount and duration of congestion is expected to increase in the future as suburban development continues in the eastern portions of Sacramento County and in El Dorado County. This Project will improve mobility, provide an option for reliable peak period travel time, and provide incentives for commuters to use buses, carpools, or vanpools for peak period travel to improve traffic operations by reducing congestion and travel time.

### Greenhouse Gas Emissions (CONTINUED)

For the HOV Lanes project, the California Air Resources Board Calculator Tool for the California State Transportation Agency Transit and Intercity Rail Capital Program Greenhouse Gas Reduction was used to estimate the reduction and reported in the Final Environmental Document. The total reduction in the Greenhouse Gas (GHG) emissions (MTCO2e) was estimated as 70,824 metric tons.

DTP-0001 (Revised July 2017)

### Additional Information

### DESCRIPTION (CONTINUED):

The additional frequencies will likely increase ridership. This project is a co-applicant with the Caltrans Sacramento US 50 HOV Project from I-5 to Watt Ave for the SB1 Solutions for Congested Corridor Program funds.

Date: 8/14/18

### PROJECT BENEFITS (CONTINUED):

The light rail expansion project proposed by SACOG and SacRT will make improvements to SacRT's Gold Line between downtown Sacramento and downtown Folsom to increase train frequency.

Additional objectives to this project include:

- · Increasing light rail ridership
- Creating connectivity and consistency with the planned HOV system and Light Rail system in the region
- Improved mobility for all modes
- Improved bicycle and pedestrian access

### PURPOSE AND NEED (CONTINUED):

This additional Light Rail frequency is expected to increase the ridership. The combination of new HOV lanes and additional Light Rail service is expected to improve the mobility along this corridor with a multimodal approach.

### Greenhouse Gas Emissions (CONTINUED)

For this project, the emissions reduction is estimated at:

CO Emissions Saved: 245 metric tons, or 12 metric tons annually

CO2 Emissions Saved: 104,074 metric tons, or 5,204 metric tons annually

NOX Emissions Saved: 11 metric tons or 1 metric tons annually VOC Emissions Saved: 23 metric tons or 2 metric tons annually
